LIBRETTO DEGLI SCHEMI DI POSA

Ego[®], un parquet prefinito a quadrotti interamente costruito a mano nei laboratori Arbolgallery, ideato dal designer Stefano Bonetti. Formato 400x400 mm, spessore totale 20 mm, 15 mm di legno nobile e 5 mm di multistrato di betulla. Gli adesivi per l'assemblaggio, resistenti all'acqua, sono in classe D4, secondo la norma UNI EN 204/205. È possibile scegliere tra diverse essenze: Rovere naturale o tingeggiato con varie finiture, Wengè, Teak e Iroko. La superficie può essere spazzolata o liscia e trattata ad olio naturale o con vernice antibatterica. Ego[®] può essere realizzato accostando al legno altri materiali quali marmo, altre tipologie di pietre ed ogni altro materiale adatto al calpestio. I quadrotti sono dotati di incastro a femmina su tutti i lati, vengono forniti con anime in legno per l'assemblaggio, sono idonei per la posa incollata ad elevata stabilità e adatti per il riscaldamento a pavimento. Grazie al particolare disegno del modulo è possibile generare geometrie sempre differenti semplicemente variando il lato di accoppiamento del quadrotto ruotandolo piacere. Le infinite possibilità di posa fanno di Ego[®] un parquet unico nel suo genere.

Ego[®], is a prefinished squared wooden floor fully handcrafted in Arbol workshop designed by Stefano Bonetti. Format 400x400 mm, total thickness 20 mm, 15 mm of selected hardwood top layer and 5 mm of birch plywood bottom layer.

The adhesives used for the assembling are waterresistant, D4 class, in compliance with UNI EN 204/205. The top layer can be made with different types of wood: oak, natural or painted with various finishes, Wenge, Teak and Iroko. The surface can be brushed or smooth and protection can be achieved with natural oil or antibacterial water based lacquer.

Ego[®] can also be achieved by combining other materials such as marble other types of stones and any other suitable underfoot. The squares are provided with tongue & groove on all sides, supplied with anime wooden for assembly and designed for glued laying, highly stable and suitable for underfloor heating. Different geometries can be generated by varying the coupling of the edges simply turning the modules.

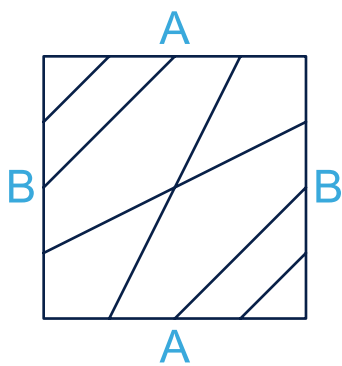

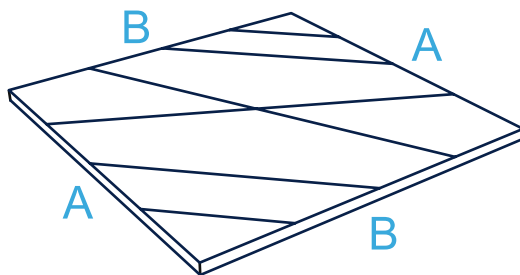

The possibility of infinite setting patterns, makes Ego a unique wooden floor.
